matting solutions
for large multi-site facilities

Edgewood has matting for any entrance but we understand the complexities of managing matting for multi-site facilities and have a strategy to make it easier.

building name: cawson elementary

For Quoting MAT #	Entrance Location	Entrance Label	Product	Measure-ments	Width	Length	Exist Ma Ty
1	Main Entrance	Recessed Well					
2		Hall Runner	Everest	2 m. x 8'	6.5	8	
3	By Room 1	Recessed Well					
4		Hall Runner	Everest	2 m. x 8'	6.5	8	
5	South Portable	Entrance Door	Everest	2 m. x 4'	6.5		
6	By Room 18	Recessed Well					
7		Hall Runner	Everest	2 m. x 6'	6.5		

An Edgewood multi-site audit creates maps and a database of entrances. Our experience and product selection ensures the correct mats for each entrance.

A multi-site program will help you reduce maintenance cost year over year and control your spending with options for phased implementation.

- Predictable replacement cycles.
- Rotation plans between entrances.
- Lower labor and cleaning materials costs.
- Reduced slip and fall claims.

Many Edgewood mats have recycled content and CRI Green Label Plus certification.

managing matting for large-scale, multi-site facilities is daunting

For example, a University can have 350+ entrances.
We know. We counted.

Don't be overwhelmed — Edgewood has the expertise to handle even the most complex matting requirements with industry-leading knowledge.

YOU NEED TO KNOW:

- What kind of mats will best suit your needs?
- How many entrances in each building?
- How many mats should be at each entrance?

We provide an **in-depth facility analysis,** and with the help of our knowledgeable dealers, we complete projects **efficiently, accurately, and on schedule.**

As a member of the Canada Green Building Council, Edgewood can assist with projects that are seeking LEED certification. Many of our products are manufactured with recycled content taken from both post-industrial and post-consumer recycled material.

recent projects

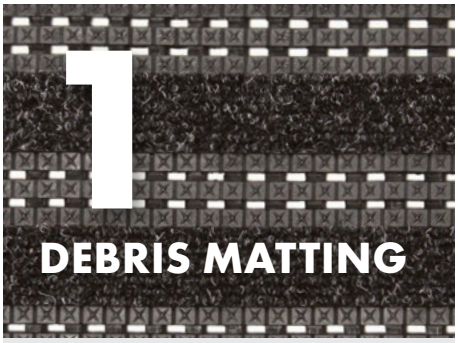
the edgewood method

three steps to a cleaner building



LOCATION:

Vestibules, exterior entrances, parking levels

RECOMMENDED LENGTH:

3 – 5 ft.

DESCRIPTION:

This matting removes moisture, dirt, salt and fine sand from your shoes, making your footwear floor-friendly.

TYPES:

Base Series, Debris Trap™ Series

LOCATION:

Exterior entrances, vestibules

RECOMMENDED LENGTH:

15 – 20 ft.

DESCRIPTION:

High-capacity wiper/scraper mats aggressively trap water, snow and sand from footwear at your busiest doors.

TYPES:

Tundra, Tundra Plus, Gritstop Fingermat™, Scraper Mat

LOCATION:

Interior entrances, gyms, hallways

RECOMMENDED LENGTH:

15 – 20 ft.

DESCRIPTION:

This is the last step in protecting your floors from damage and people from slips. They minimize moisture and trap fine particles, leaving you with a safe, clean and exceptional facility.

TYPES:

Everest™, Rainier, Supreme Knob™, Premium Knob™, Palliser, Chaparral Tile
